

Ramudden Global UK Tax Strategy

This document, approved by the board of Ramudden Global (UK) Limited (“the Group”) sets out the Group’s approach to conducting its tax affairs and dealing with tax risks for the year ending 31 December 2024. This strategy applies from the date of publication until a new one takes its place.

The tax strategy covers all corporate income taxes, indirect taxes, property taxes, employment taxes and any other taxes the Group may have and covers the Group’s strategic approach to tax, tax planning, and the Group’s approach to dealing with the tax authorities.

Risk Management

The Board is ultimately responsible for the management of tax risk to ensure that the appropriate accounting processes and controls are in place, identifying and managing tax risks and accounting for them appropriately.

The Group is committed to:

- Having a low-risk appetite towards the tolerance of tax risk;
- Paying the right amount of tax when, or before, due;
- Adhering to all tax legislation and reporting requirements;
- Maintaining an open and transparent relationship with HMRC.
- Not engaging in aggressive tax planning or making use of tax avoidance schemes.

The Group invests in the ongoing professional development of its employees and has engaged the services of independent tax experts to help monitor and manage those risks, whenever the necessary expertise is not available in house.

Tax Planning

The Group’s tax planning is driven by the commercial needs of the business and anticipated future developments. Where alternative routes exist to achieve the same commercial results, the most tax efficient approach in compliance with all relevant laws will be followed.

The commercial needs of the business will in no circumstances override compliance with relevant laws and regulation.

In cases where tax guidance is unclear or the Group does not feel it has the necessary expert knowledge to assess the tax consequences adequately, external advice may be sought to support the Group’s decision-making process.

Approach towards dealings with HMRC

The Group is committed to having an open dialogue and ongoing relationship with HMRC, and as such, seek to resolve issues with HMRC in real time and before returns are filed if possible.

This includes making accurate and timely disclosure in correspondence and returns, as well as responding to queries and information requests in a timely fashion.
